Generiamo più energia solare di quanta ne serva per produrre gli articoli dei nostri brand Palma e Origins1971. Gli spazi sono riscaldati grazie ai residui di lavorazione del legno. L'acqua immessa nel ciclo produttivo è gestita come una risorsa preziosa. Oltre l'80% dei rifiuti viene recuperato e riciclato.

We generate more solar power than required for the production of our Palma and Origins1971 brands. The workplaces are heated thanks to wood leftover from the production process. Water used in the production process is treated as a precious resource. Over 80% of the waste produced is recovered and recycled.

Nous produisons plus d'énergie solaire de ce qui sert pour la production des articles de nos collections Palma et Origins1971. Les différents locaux sont réchauffés avec les résidus de la transformation du bois. L'eau utilisée dans le cycle de production est gérée comme une ressource précieuse. Plus du 80% des déchets est récupéré et recyclé.
